In Chinese legend, it is said that the world began in the form of a giant, cosmic egg containing all the matter of the universe. Inside this egg, the giant PANGU slept and slept...One day, after 18 000 years, PANGU awoke, stretched and broke the egg in two!

What happens next?!?

Don’t miss the telling of this little known legend of the world’s creation through music, drama, movement and visuals.
